

Dear all,

I was in a hospital for a week due to my severe lower back pain. I couldn't figure out why it was all of a sudden so painful. When I wasn't even able to walk or stand, I realized that I had a problem. After I got off from the hospital, I went to visit my family doctor and he said that I needed to take painkillers and go through physical therapy. Well, I had been faithfully doing it; however, the pain would re-occur once every 2 weeks for several of days. I was only 30 years old and I was thinking how I could live for the rest of my life. So I prayed and prayed....

One day, someone from my church recommended me to see a Chiropractor. I told him that I had seen a couple but they were cracking my body without even taking the x-ray. My concern was what if I had injury inside my body. My friend told me that this is different. This is upper cervical. So I went and talked to Dr. Crusade.

I took the X-ray and Dr. Crusade was patiently explaining to me about why I had the back pain. I believed what she said was true because I could see from my x-ray that my spine wasn't straight due to misalignment of my Atlas and Axis. So I began my treatment and I felt the retracing. Soon enough, my back pain was gone... then I was curious about my eczema (skin problem). I had this for probably 20 years now. Dr. Crusade told me that it'd recover too if I do not have subluxation of the nerves. So in my mind, I told myself that I would wait for 3 years and find out. My dermatologist told me that my eczema would get worse and worse. So, about half a year, my skin condition was dramatically improved. Not only that, other symptoms were also disappearing too. I used to have cold body temperature all the time, but now my body is constantly warm. I used to have very severe allergy problem, but now my allergy problem is gone. I used to have constipation problem, but now the problem is gone. For my eczema problem, well, it has gone through a lot of retracing, but now is almost 90% recovered.

I have been a patient for 2.5 years now and I will continue to visit Dr. Crusade and make sure that I do not have subluxation because I want my body to function the most optimal way and do not want to wait for the symptoms to occur. I am a Christian and I truly grateful to God who has answered my prayer and thank Dr. Crusade for taking care of me all these times.

Sincerely,  
Sam Chiu
